plugins can import and export DXF. In 2007, Autodesk enabled the public to create their own applications on the Autodesk Exchange. The basic premise of the Autodesk Exchange is that 3rd party developers can submit software or applications to Autodesk, who, in turn, turn these ideas into completed software, built into the Autodesk Exchange. These plugins are known as "Exchange Apps". It was later announced that Autodesk would no longer accept new applications on the Exchange; only existing ones will be developed.
